PROFESSIONAL DESCRIPTION

RED 10A digital single-phase regulator:

The regulators of the RCS series, suitable for driving fans with single-phase asynchronous motors, make use of particular technical features to guarantee the best regulation performance without compromising the optimal functioning of the motor. For the driving phase, they use an 8-bit microprocessor which constantly follows the sinusoid with maximum precision, guaranteeing perfect switching of the triac and therefore optimal operation of the motor. Filtered according to current CE regulations, they make the regulators of this series the most requested on the market.
