PROFESSIONAL DESCRIPTION

PIZZA PEEL BY THE METER in ALUMINUM, AZURRA line, light, flexible and resistant, complete range :

- **Anodized aluminum peel for pizza by the metre** , a particular type of maxi-sized pizza. The pizza can be impaled directly with the tool or the dough is spread and the filling can be done directly on the peel.
- For this reason, a **sturdy tool** is needed, which facilitates the sliding of the dough on the refractory stone of the oven and which is at the same time **light and easy to handle** .
- The dimensions of the shovel also require, in the action of putting it in the oven, that the shovel is supported by the help of the hand. Gi.Metal's proposal for pizza by the meter is to replace wood, commonly used for this type of shovel , in favor of a **light, solid, long-lasting and certainly more hygienic material such as anodized aluminium** .
- **Neutral anodizing makes the surface of the blade uniform, protecting it from oxidation, as well as guaranteeing incomparable lightness** .
