Services and Technologies for professional catering since 1973

PROFESSIONAL DESCRIPTION

Round , non-stick perforated pizza pan , with high edge cm 1,3, models with diameter 30 and 34.

NOTE:

- Purchasable in the **minimum quantity of 5 pieces.**

INSTRUCTIONS FOR USE AND MAINTENANCE OF THE TRAYS

IMPORTANT :

Regardless of the type of material, all the flat trays are **never left empty** .

NON-STICKING TRAYS

For cleaning use the air jet or soft nylon brushes. **Do not scratch the coating** with metal tools or abrasive brushes as the incisions may give rise to permeation and following corrosion.

Do not put empty molds in the oven at temperatures above 200 ° C. This temperature represents the thermal resistance limit of the resin. Furthermore, at this temperature the coating sensibly softens, leading to a rapid decay of the non-stick characteristics.

Do not wash the pans with high pressure pulvapor and do not use caustic solutions.

For cleaning **use damp soft cloths** .
